Theoretical and Applied Fracture Mechanics 17 (1992) 245
Elsevier

Contents Volume 17

Vol. 17, No. 1

K.S. Zhang and C.Q. Zheng
Fracture initiation modelled by weighted energy density function 1
Th.B. Kermanidis, S.G. Pantelakis and N.D. Batsoulas
Creep damage assessment of austenitic steel specimen subjected to time varying load 7
J.H. Bulloch
Fractographic analysis of fatigue cracking in spheroidal graphite cast irons 19
M. Konsta-Gdoutos and E.E. Gdoutos
Some remarks on caustics in Mode I stress intensity factor evaluation 47
C. Bosco and A. Carpinteri
Fracture behavior of beam cracked across reinforcement 61
G.X. Zhang and G.T. Liu
Thermally stressed multiple systems in steady state 69
E. Smith
Geometry dependence of crack growth resistance curve for a ligament toughened brittle material 83

Vol. 17, No. 2

J.H. Bulloch
Characteristics of the fatigue crack extension process in quartzite rock 93
J. Gibson and J.H. Bulloch
Strain strengthening effects in Witwatersrand quartzite 107
Z.X. Li and J.C. Qian
A creep model for concrete with damage in the axial and lateral directions 115
Y.C. Gao, Y.C. Loo and D.G. Montgomery
A fracture model of reinforced concrete 121
A.K. Kaw, A.S. Selvarathinam and G.H. Besterfield
Comparison of interphase models for a crack in fiber reinforced composite 133
S.N. Feng, C.Q. Zheng and X.L. Li
Influence of stress triaxiality and temperature on void growth and ductile/brittle transition behavior of 40Cr steel 149
Z.Q. Mu and C.W. Lung
Fractals identified with fracture surface of high strength steel 157

Vol. 17, No. 3

T.H. Hao, X.T. Zhang and K.C. Hwang
Inhomogeneous behavior of anti-plane shear crack in softening material with local unloading 163
C.K. Chao and R.C. Chang
Crack trajectories influenced by mechanical and thermal disturbance in anisotropic material 177
Y.Z. Chen and N. Hasebe
Stress-intensity factors for curved circular crack in bonded dissimilar materials 189
L.S. Fu
Dynamic elastic stiffness with service generated inhomogeneity for fibrous composites 197
V.V. Tvardovsky
Stress intensity factors for anisotropic layered composites: Part I—isolated collinear cracks 205
V.V. Tvardovsky
Stress intensity factors for anisotropic layered composites: Part II—isolated double periodic cracks 221
T.H. Hao
An isolated crack normal to a bimaterial interface of infinite extent under antiplane shear 233
D. Munz and T. Fett
Discussion: "Determination of weight functions from reference stress intensity factors", by G. Shen and G. Glinka 239
G. Shen and G. Glinka
Closure on discussion by D. Munz and T. Fett on "Determination of weight functions from reference stress intensity factors" 241
